

## Panoram deploys Nuix and provides local expertise to meet Taylor Wessing's client's tight disclosure deadline

Sometimes eDiscovery requirements are not vast in scale, but they still demand urgency and cost efficiency. Taylor Wessing's real estate team turned to Panoram for a tricky disclosure exercise with tight deadlines.

## TaylorWessing

Taylor Wessing is a global law firm that serves the world's most innovative people and businesses.

**17** Locations  
**29** Offices  
**1,100** Lawyers  
**40** Languages

### Challenge

As is often the case, the end client was not a seasoned litigant and had no previous experience with eDiscovery. They and their accountants needed assistance with data collection. Whilst the data size was not large, there was significant duplication and privileged communication needing special attention. Also the production needed to be in a PDF bible format, rather than a traditional load file for a large eDiscovery system. Panoram's experts readily accommodated all these challenges.

### Solution

Panoram provided expert eDiscovery advice and responsive project management throughout, enabling production within 2 weeks. The Taylor Wessing legal team enjoyed using the Nuix Discover platform: it provided an intuitive environment which allowed everyone involved to be up and running quickly and collaboratively. The lawyers appreciated the flexibility to produce the documents in the very specific required format and had a great experience from start to finish.

*"We really enjoyed using the intuitive Nuix platform"*

### About Nuix

Nuix specializes in transforming massive amounts of messy data – from emails, social media, communications and other human-generated content – into actionable intelligence. With our investigative analytics and intelligence software, you can understand the context and connections across billions of items in your data – search it, filter it, visualize it, analyze it and find the truth it holds.

### Results

Panoram's experts met the client's needs by:

- ✓ Assisting with the data collection, including guiding custodians through collection via MS Teams or, when low bandwidth prevented this, travelling to the customer's site for on-site service.
- ✓ Loading the collected data Nuix Discover for de-duplication. Privileged documents were identified and excluded from review and remaining documents automatically placed into streamlined workflows.
- ✓ Accelerating the review through customized coding forms
- ✓ Training the legal team to ensure the completion of the review in a timely manner.

In fact, the review was completed within a week, delighting both the client and the legal team.

*"Panoram were very flexible and helped us meet our deadlines"*

### About Panoram

Providing a fresh alternative to today's global eDiscovery solutions, Panoram offers a world-class, results-driven client experience on the most innovative market leading technology platform, accelerating both the **speed to** and **speed of** document review.
